REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-2, 4, 6-8, 9-13, 14-17, 19-25, 28-34, 35-38, and 40-43 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach a method and apparatus of performing power control where to control the power of a remote wireless terminal the signature of the communication channel is developed by measuring the signal to noise ratio, and calculating a second order statistic of the signal to noise ratio thus defining the signature. Then, comparing a metric value with a target metric value performs power control over the remote unit, and the target metric value is adjusted based on a variable function of the signature of the communication channel.

Kanai in view of Minde, discussed in prior office action disclosed adjusting the target metric value used in power control based on the signature of the communications channel. Kanai showed adjusting the target value based on signature of the channel and Minde showed the signature could be the second order statistic of the signal to noise ratio. Kanai and Minde were disclosing adjusting the target valued by discrete values therefore, failed to teach the target metric value is adjusted as a variable function of the determined signature of the communications channel.
